DETAILED ACTION

Claims 1-21 are currently pending in this application. Claims 16-19, are withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b), as being drawn to a non-elected invention. The withdrawn subject matter is patentably distinct from the elected subject matter as it differs in structure and element and would require separate search considerations. In addition, a reference, which anticipates one group, would not render obvious the other.

Priority

This application claims the benefit of U.S. Provisional Application No. 60/446,682 filed 11 February 2003 and U.S. Provisional Application No. 60/512,826 filed 20 October 2003.

Response to Restriction

Applicant's election of the invention of Group I, claims 1-15 and 20-21 (all claims in

part) drawn to products of Formula I,

and the specific compound

of Example 31, _____ in response filed 14 September 2006 is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Art Unit: 1626

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicants preserve their right to file a divisional on the non-elected subject matter.

Scope of the elected and examined subject matter

Compound of formula I,

depicted in claim 1, wherein:

$A^1 - A^5$ are as defined; Q is a carbocyclic group; T is as defined; $R^1 - R^{10}$ and R^{99} and R^{100} are as defined but don't represent a heterocyclic group; m and n are as defined.

As a result of the election and the corresponding scope of the invention identified supra, the remaining subject matter of claims 1-15 and 20-21 are withdrawn from further consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. The withdrawn compounds contain varying functional groups such as triazine, homopiperazinyl, thiomorpholinyl, propylaminyl etc, which are chemically recognized to differ in structure and function. This recognized chemical diversity of the functional groups can be seen by the various classification of these functional groups in the U.S. classification system, i.e. class 544 subclass 63(+) (thiomorpholine), class 540 subclass 450(+) (homopiperziny), class 544 subclass 180(+)

Art Unit: 1626

(triazines), 548 subclass 400(+) pyrrolidines etc. Therefore the subject matter which are withdrawn from consideration as being non-elected subject differ materially in structure and composition and have been restricted properly a reference which anticipated but the elected subject matter would not even render obvious the withdrawn subject matter and the fields of search are not co-extensive.

Objections

Claims 1-15, 20 and 21 are objected to for containing non-elected subject matter. The claims must be amended to exclude non-elected subject matter.
